Shoh Ake Bank Strategy v1 Pro [SARVEX]

Advanced Pine Script v5 Algorithm | Developed by Sarvarbek Salimov (SARVEX)

Official GitHub Repository Description (Max 350 chars):

> "Shoh Ake Bank Strategy v1 Pro is an advanced Pine Script v5 algorithmic indicator designed for TradingView. It detects institutional liquidity sweeps (Smart Money Concepts), impulsive displacements, and features multi-tier ATR/Fixed Pips risk management with 1:1, 1:2, and 1:3 TP targets. Created by SARVARBEK SALIMOV (SARVEX)."

1. Executive Summary & Philosophy

Designed for professional scalpers and swing traders, the **Shoh Ake Bank Strategy v1 Pro** models institutional trading behavior. Rather than relying on traditional lagging indicators, it tracks market maker liquidity engineering (Stop Hunts / Sweeps) combined with robust volatility filtering and multi-target reward scaling.

🏦 Bank Liquidity Sweeps

Identifies structural pivot highs and lows where retail stop losses accumulate, triggering high-probability reversal entries upon displacement.

📊 Multi-Tier Risk Engine

Supports ATR dynamic multiplier sizing and fixed-pip "Razgon" scalping modes, automatically plotting precise 1:1, 1:2, and 1:3 risk-reward zones.

2. GitHub README.md Specification

To publish this indicator professionally in your GitHub repository, use the following Markdown code for your primary `README.md` file:

```
     # Shoh Ake Bank Strategy v1 Pro [SARVEX] An institutional-grade TradingView Pine Script v5 indicator built for automated liquidity analysis and precision scalping. ## 🚀 Key Features - **Liquidity Sweeps (SMC):** Detects market maker sweeps above/below swing highs and lows. - **Displacement Filter:** Confirms momentum through candle body expansion. - **Risk Management:** ATR Based or Fixed Pips (Razgon) modes. - **Automated TP/SL Boxes:** Visualizes entry, stop loss, and 3 take-profit levels. ## 📥 Installation & Usage 1. Open TradingView and go to the Pine Editor. 2. Paste the source code from `shoh_ake_strategy.pine`. 3. Click **Add to Chart** and configure your parameters. --- **Created with precision by SARVARBEK SALIMOV (SARVEX)** Telegram Channel: [@sarvex_fx](https://t.me/sarvex_fx)
```

💡 Brand Identity Integration

This repository embeds the signature **SARVEX** brand aesthetic—combining clean obsidian dark mode themes with violet neon accents, reflecting cutting-edge quantitative finance and software engineering standards.

3. Complete Technical & Operational Guide

The indicator operates through a rigorous 4-stage algorithmic pipeline designed to filter false breakouts:

Pipeline Stage	Parameter / Logic	Execution Rule
1. Liquidity Hunt	Swing Lookback (Default: 7)	Detects price breaching recent pivots while closing back inside the range.
2. Displacement	Candle Body > SMA(Body, 10)	Requires strong impulsive candle body confirming institutional participation.
3. Trend Filter	EMA 200 (Optional)	Filters trades strictly in alignment with the macro market direction.
4. Target Scaling	TP1 (1:1), TP2 (1:2), TP3 (1:3)	Calculates dynamic risk-reward boxes with real-time pip calculations.

⚠️ Risk Disclaimer

Quantitative trading involves substantial risk of loss and is not suitable for every investor. The **Shoh Ake Bank Strategy v1 Pro** is an analytical tool designed to assist in decision-making and does not constitute financial advice. Always test thoroughly in demo environments before live execution.
